

TO USE THE SKY MAP:
 Hold the map over your head with "North" pointing towards the northern horizon on the Earth. The center of the map marks the point directly overhead. The position of the constellations on the map will match the night sky.

EARLY NOV. 9pm
LATE NOV. 8pm
 The Skyguide is drawn for 43 degrees north latitude, but is useful for other nearby latitudes. Planet positions are shown for mid-month, unless otherwise noted.

Building America's Canals at Sloan Museum until Jan 10, 2010

You know the history, now experience the adventure!
Recommended for children 4 and older.
